(54) Title: CATALYST STRUCTURE AND METHOD OF FISCHER-TROPSCH SYNTHESIS

(57) Abstract: The present invention includes Fischer-Tropsch catalysts, reactions using Fischer-Tropsch catalysts, methods of making Fischer-Tropsch catalysts, processes of hydrogenating carbon monoxide, and fuels made using these processes. The invention provides the ability to hydrogenate carbon monoxide with low contact times, good conversion rates and low methane selectivities. In a preferred method, the catalyst is made using a metal foam support.

INTERNATIONAL SEARCH REPORT

rational application No. PCT/US 00/22422

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-3, 11-16, 17-19
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-3, 11-16, 17-19

A catalyst for the hydrogenation of carbon monoxide comprising a porous support, an interfacial layer and a Fischer-Tropsch catalytic metal and a process using this catalyst.

2. Claims: 4-6, 8-10, 20-21

Claim 4 and its dependent claims 5 and 6 describe a Fischer Tropsch catalyst comprising a catalytic metal on a porous support and characterised by an activity such that the selectivity to methane is less than 25 % and the carbon monoxide conversion is greater than 25 % and a process using this catalyst.

3. Claim: 7

A reactor for the hydrogenation of carbon monoxide, having thermally conductive walls and containing a catalyst comprising a supported Fischer-Tropsch catalyst.
